Release Notes

Optisoft.NET v1.2.21173.1   23rd June 2021

Issues

Patients Recall
- Resolved an issue that was preventing Irish mobile phone numbers from being correctly identified as a validated Recall communication method.
- Addressed an issue with apostrophes when searching for patients.
- Addressed an issue where deleted Spectacles Dispense notes were still being displayed in the Spectacles history tab.

Cash
- Resolved an issue that was causing an error and preventing the barcode search from functioning in the till.
- Made a change to the receipt printing to use the PDF format as an intermediary before printing to resolve a potential compatibility issue.

Spectacles
- Addressed an issue that was preventing new or updated dispenses from saving when the user opened another dispense from the History tab.

Clinical Records
- Deleting a Page Option now correctly clears the screen.

Changes

Patients Recall
- A Last Visit date column has been added to the search results window when searching for a patient.

Cash
- Added an option in the Settings to allow the user to specify the receipt format, per PC, as either 80mm (standard receipt printer size) or A4.

Maintenance / System Wide
- Further changes have been made to the way that modules cache data to aid in improving the performance of the Patients, Appointments and Clinical Records modules.
- Added an Optisoft Online Learning link to the File Menu.
