

Release Notes

Optisoft.NET v1.2.21180.1

29th June 2021

Issues

Patients Recall

- Addressed an issue with the Auto graph in Recall not correctly displaying patient's who had been suppressed by a booked appointment that has since passed.

Clinical Records

- Addressed an issue with '£' being replaced with '?' in note pages on save.
- Addressed an issue that was preventing saved Drawings from being accessible once saved.

Changes

Clinical Records

- Made changes to improve the performance of loading a contact lens prescription page in a visit.
