Release Notes

Optisoft
SOFTWARE MADE SIMPLE

Optisoft.NET v1.2.21187.1   6th July 2021

Issues

Patients Recall
- Addressed an issue with the Page Up and Page Down buttons erroring when cycling through records.
- Addressed an issue with the Contact Lens Rx summary showing the Base measurement in the incorrect place for the left eye.

Cash
- Resolved an issue with VAT on refunded items incorrectly showing as a positive on the reports.

Clinical Records
- Corrected an issue with the incorrect colour being used by the brush tool in the drawings screen.
- Addressed an issue with the Copy Eye button in prescription screens effecting all of the tabs, rather than just the selected one.
- Corrected an issue where a user could create a visit record without having selected a patient.

Spectacles
- Corrected an issue that meant that the dispensing print out could merge the active patient's Rx details rather than the dispensed patient's current Rx details.

Changes

Patients Recall
- Added extra fields to the output file of the Export method of a recall run.

Clinical Records
- Made further changes to improve the performance, especially contact lens Rx pages.
