

# Release Notes

Optisoft.NET v1.2.26117.2

1 May 2026

## Issues

### Patients Recall

- Addressed an issue that could occur when using the Surgery search if the contact had more than one email address.
- Resolved an issue with the Patient's history tabs not correctly updating to reflect the active modules when switching branches.
- Addressed an issue that prevented the user from removing deleted GP or Surgery details from a patient.
- Resolved an issue that would prevent the user unlinking deleted users from Todos associated with deleted patients.

### Email / SMS

- Resolved an issue that would prevent the user from attaching more than one file to an email.

### Clinical Records

- Resolved an issue that meant that certain information labels were being obscured within the Clinical Records visit.
- Addressed an issue that could mean that certain screen elements were un-selectable at certain screen resolutions.

### Spectacles

- Addressed an issue that could mean that Adjustments were incorrectly totalled when applied on the Sundries, Fees and Vouchers tab.
- Resolved an issue that would result in the Lens Extra section of a dispense to 'flicker' which would then lead to an incorrect total.
- Addressed an issue that could lead to long load times within the dispensing module.

### Stock

- Addressed an issue with Stock In auto balancing not being correctly restricted to the correct branch's transactions.

### Templates

- Resolved an issue that allowed a user to enter non-alpha numeric characters for the filename of template documents.
- Addressed an issue that could occur when attempting to merge a document that included certain Rx and/or Spectacles merge codes.

### Maintenance / System Wide

- Addressed an issue that was preventing the Activity Pane from refreshing in a timely manner.
- Addressed an issue that could lead to long load times when attempting to make changes to Supplier records.

# Release Notes

## Changes

### Patients Recall

- Made a number of changes and improvements to the inbuilt OptiPost (DocMail) integration.

### Reports

- Added a new Cash Sales Analysis report.

### Maintenance / System Wide

- Added the ability to add words to the spell checker dictionary across all template editors.
